No 268/46-47 / Plan

Bangalore, 2nd August 46

Returned with compliments

The facts of the case as disclosed from the
records are as follows -

23) In July 1943, the Municipal Commission, C & M
Station, Bangalore asked for permission to connect the
underground sewage from the Mc'Iver Town to the City under-
ground system. In support of this request it was point-
ed out that a similar facility had been afforded by the
Commission in respect of the sewage from the Devarjevan-
halli area within the City limits. The Special Officer,
Drainage Division reported that the C & M Station autho-
rities might be permitted to lead the sewage from the
Mc'Iver Town area into the Septic Tank behind Sampangi
Tank (vide Map placed in the file). Thereupon the Direc-
tor of Public Health recommended the case to Government,
and the latter conveyed their approval to the proposal in
the Law Secretary's letter No L 4575, dated the 1st Novem-
ber 1943.

24) Subsequent action was taken by the Commission
without any reference to the City authorities. It
appears from the letter dated the 12th February 1945
from the Managing Director, United Breweries, Bangalore,
that the Commission first asked the Breweries to lay a

a 12" line from the works to the manhole 'A' near the Dobhi Ghat, and later on, insisted that the line should be extended as far as the manhole 'B' near the Septic Tank, entailing a further cost of Rs 22,532/- to the Breweries. Such extension was necessary as the 6" line in which manhole 'A' is situated was incapable of taking any additional discharge

25) The Breweries can have no claim on the Mysore Government in regard to the additional cost alleged to have been incurred on extending the line. The permission accorded by Government was on the understanding that the wastage water from the Breweries and the Sewage from the Mc'Iver Town would be let into our drainage system at the Septic Tank which is close to the manhole 'B'. It seems that the Breweries are now threatening not to permit the Municipal Commission to use the 12" line, laid at their expense, for carrying the sewage from the Mc'Iver Town. This, however, is a dispute with which the Mysore Government are not concerned.

26) The Comprehensive Drainage Scheme as sanctioned by Government provides for laying a 9" main to convey sewage from the manhole 'B' (or Septic Tank) into the Ovoid Sewer. After Mr Y. Ramaswami became the Special Officer, he ascertained from the C & M. Station authorities that the discharge of sewage from the Mc'Iver Town into the City Drainage System would be about 20,000 gallons a day including the effluent from the Breweries. On receipt of this information, he was of opinion that this additional quantity necessitated the substitution, at an extra cost of Rs. 6,000/+, of a 12" main for a 9" line, already sanctioned. As this was a technical matter the Trust Board referred the question to the Chief Engineer for Roads and Buildings for an expression of his views. The Chief Engineer agreed with Mr Y. Ramaswami. The Board therefore at its meeting held on 8th July 1946 passed resolution to the effect that "in the opinion of competent authorities, a 12" main was necessary"

27) The question now is, as to who should bear this extra cost of Rs 6,000/-. Unfortunately, at the time permission was granted to the Municipal Commission, this aspect of the matter was not considered. However, I find from the file of this office that the Special Officer (Mr K D Joshi) reported as follows to the Director of Public Health in his letter No 26, dated the 16th July 1943 -

there is a 7" diameter sewer line running right across the Sampige tank to which it may be possible to connect the Mc'Iver Town sewer. But this line carries sewage from the Old Public

3080 JY 11

Offices, the Soap Factory, Insurance Office, Telephone Exchange, Engineering College & Workshop, Intermediate College, etc. and examination this morning it was found to be with a large quantity of discharge. It is therefore not possible to connect up the Mc'Iver Town sewage to this 7" diameter line at present.

There is a proposal to connect up this line to the Main Overhead Sewer by a 9" line and when this is done, perhaps a year or two hence, the sewage from the Mc'Iver Town area, if not large, could be drained into this 9" pipe. The proposal could be considered at that time."

28) It is not clear from the file why in the circumstances reported by the Special Officer, the Director of Public Health did not ask the Special Officer to ascertain the extent of discharge and investigate whether our Sewer system, as planned and approved, was capable of taking this additional inflow. It does not appear that a copy of this report was sent to Government when the case was recommended to Government for sanction.

29) The permission accorded to the Municipal Commission apparently was on a reciprocal basis, and I doubt very much, whether it is open to us now to call upon the Commission to pay the extra cost. This is, however, a matter for legal opinion, and it is suggested that the Law Secretary to Government be consulted on the point. Mr Y. Ramaswami points out in this connection, that from Devarjeevanhalli area, very little sewage flows into the C & M Station system entailing no extra cost whatever, while, in the present case, the Mysore Government will have to bear an unnecessary expenditure of Rs 6,000/- for the benefit of the C & M Station and particularly, of the United Breweries. Pending decision on this point, Mr Ramaswami urges that the permission of Government be obtained for carrying out this much delayed work.

2 The proposed new line has to carry a discharge of about
 20,000 gallons and also, as ascertained from the Drainage Engineer,
 the sewage water (and occasional storm water) from the two higher
 lines of 7' and 12'. The diameter of the new line must therefore
 be 12' as already intimated by me to the Chairman City Improvement
 Trust Board, Bangalore, in my letter of 10/10/42 dated 22nd May 1946

Serial
No

36 The facts of the case are explained in paras 23 to 29. This ^{portion} has to be read with reference to the sketch flagged D.

37 The new line of 9" diam. ^{already laid} (shown in red pencil) will have to be replaced by a 12" diameter line so as to enable it to receive the sewage from the C & H station (12" red ₂

(laid line)
shown in green pencil

38 The ~~cost~~ cost-entailed for laying this line of a wider diameter is Rs 6000. The point for consideration is to who is to meet this cost—

The Brewers, or the C & H station or the Drainage Division. The Brewers are not likely

to meet this ~~cost~~, as they have already laid a counter drain for laying further the 12" line

(wide green pencil line in the sketch)

The C & H station authorities may be approached in the matter but since this area will

shortly become part of the Hyderabad

~~territories~~ ^{fact}, the claim ~~will~~ is now to be referred to the Planning Mf. Hence as already stated by the Dr J & H in his

letter no R 9-9 Mm-11-5 41144, this amount can be met out of the savings

To The Secretary to Government,
Public Health Department, Bangalore

1st November 1944

Ml. 51-46-51

Sub - Linking up the existing septic tank behind
the Sampangi Tank bund with Manhole No 4 on the
Main Ovoid Sewer modification proposed viz lay-
in of 12" sewer instead of 9" sewer

"A" Adverting to G.O. No I 3422-26 Ml 90-41-4 dated 1.11.1941
sanctioning the comprehensive underground drainage scheme
of Bangalore City, I have the honour to state that it in-
cludes the work of linking the Sampangi tank area with the
main sewer, 4th and 6th Division at a cost of Rs 13,000/-
In this estimate of Rs 13,000 provision is made for laying a
9" sewer, as it is designed to convey rainfall, half-full
0.62 cusecs which is the discharge expected at this outfall

"B" But in view of the fact it has been ordered by Government
that the effluent from the United Breweries Ltd, may also
be taken in, it is quite necessary to lay 12 inch sewer
instead of 9 inch sewer

The extra cost of Rs 6,000 involved can be met out of
savings in the comprehensive scheme

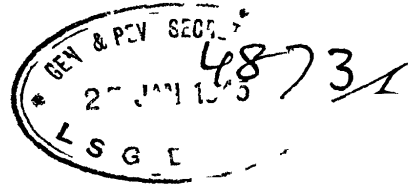

I request you to be so good as to obtain and convey
approval of Government to the material deviation in the above
estimate by the use of 12" sewer instead of 9" already pro-
vided in the sanctioned estimate

A copy of letter No 88 dated 24th October 1944 of the
Special Officer, Bangalore City Drainage, Bangalore is
enclosed herewith for information of Government

I have the honour to be,
Your most obedient servant,

S. Paulkumar
Director of Public Health

Copy of the letter No 88 dated 24th October 1944,
from the Special Officer, City Drainage Division, Bangalore,
to the Director of Public Health, Bangalore

Red Linkin, up the existing septic tank behind the
Sampann tank bund with Manhole No 4 on the
Main Ovoid Sewer

In continuation of this office No 64 dated 29-9-44
on the above subject, I have the honour to state that
there is a provision for laying a 9' sewer in the esti-
mate for Rs 13,000 sanctioned by Government for the above
work. This line is designed to convey running half full
0.62 cusecs which is the discharge expected at this outfall.

As it is proposed to take in the effluent from the
United Breweries Ltd., as per orders of Government, it is
quite necessary to lay 12 inch sewer instead of 9 inch
sewer. This modification may kindly be not approved by
Government. The extra cost of Rs 6000/- involved may be
met out of savings in the Comprehensive Scheme.

L-5724

To the Dir of Health, ~~9/11/44~~ 11/12/44
Sir, with reference to your letter no.
C9.9/8/44-45 & 4-11-44 ~~to the Dir of Health~~
requesting sanction for laying 12 inches
sewer instead of 9 inches sewer in the
estimate for linking up the existing septic
tank behind the Sampson Tank with
Manhole NO 4 on the Main Broad Sewer,
I am directed to state that, when permission
was granted in this office letter no L4575/
ml 81-43-9 & 1-11-43 for ~~connecting~~ connecting
the underground sewage from ~~the~~ Mc Iver
Town in the C & M Station to the city underground
sewage system behind the Sampson Tank
in the city, it was not expected that an extra
~~expenditure of Rs 6000~~
~~charge~~ for this account which is necessitated
by the replacement of the 9" pipe by the 12"
pipes has to be incurred. ~~that this extra~~

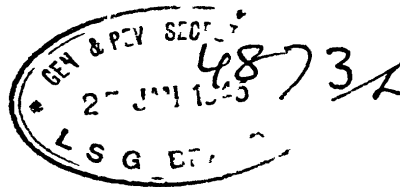

~~expenditure~~
I am to add that this extra expenditure
is not one which can be legitimately
borne by the Bangalore city m.c. &
that it has to be legitimately met
by the United Breweries Ltd., whose
effluent is intended to be carried in the
sewer of a higher capacity.

I am therefore to request you to be
so good as to state if the ^{united} Breweries
may not be asked to meet the
extra expenditure of Rs 6000/-

A very cordial reply is ^{expected} I have etc

There is a foul smelling fermenting stagnant collection of the Brewery effluent in the earthen drain in Sampangi tank to the right side of the road between Sampangi tank and St Joseph's college play ground. This open earthen drain starts out of the compound of the United Breweries, passes under Seshadri road in a well defined small earthen drain, passes along the storm water drain for about 100 yards and passes through a culvert into Sampangi tank. The bad smell is due to fermentation of the Brewery waste water. The Health Officer has been instructed to grade the drain so that no stagnation is permitted.

As per recommendations from the Director of Public Health's office, Government have given permission to the United Breweries for laying a submain from their premises to the manhole below the Sampangi tank so that the waste water can be carried into the general underground system of Bangalore. Part of the submain has been laid and about 800 feet length is yet to be laid. I understand that this work has been held up as they could not get pipes. It is also said the Company has got a priority certificate for getting the pipes, and for want of waggons, the pipes have not arrived.

I asked the Special Officer, if pipes are available in stock. He has not got any stock and he informed that Mysore Potteries also have no stock with them.

The Secretary to Government,
Law Department, Bangalore

Sir,

With reference to your letter No L 5724 dated 11th December 1944 observing that the extra expenditure of Rs 6,000/- on account of the replacement of the 12" pipe in place of 9" pipe meant for carrying the effluent of the United Breweries is not a legitimate charge on the Bangalore City Municipality and enquiring whether the United Breweries may not be asked to meet this extra expenditure etc, I have the honour to inform that the Managing Director of the United Breweries Ltd, Bangalore was requested to arrange to meet the extra cost of Rs 6,000/- as it is meant for carrying on the effluent from the Breweries. I enclose herewith a copy of the letter received from the Managing Director, United Breweries in reply to my letter

I have the honour to be,
Sir,
Your most obedient servant,

P. Parthasarathy
DIRECTOR OF PUBLIC HEALTH

Letter dated 12th February 1945 from the Managing Director,
United Breweries Bangalore to the Director of Public Health
in Mysore, Bangalore

I was very surprised to receive your letter under reference, more so as I was just about to apply to the Government of Mysore for a portion of the cost incurred in the laying of the sewer from the manhole by the side of the Dhoby Ghat in the Sampige Tank bed to the channel near the Septic Tank

I consider this portion of the line of more interest to the Government as it takes the place of the old 7" line (which is the main sewer for the Public Offices, Central College, and most of the city important Public Buildings). This sewer, you will agree, has not been functioning properly for some years, the sewage would periodically overflow the manholes in the Century Club, Golf Course (causing annoyance to high officials) and at other places down the line, more especially when the Municipal Swimming bath water was emptied into the line

From the commencement of the Scheme, we have been misled as to the terminal point of the line, and consequently its final cost. We accepted an estimate in July 43 for Rs 24,428/- to link up with the existing manhole by the side of the dohby ghat, subsequently permission was granted by Government, providing we linked up with the existing septic tank which entailed a further cost of Rs 22,552/-, this portion of the line called for excavation to,

depth of 18 feet and over, Rock blasting at 16 feet level, pumping sewage by mechanical means, not only from the tank, but also from percolation from the old 7" line

Having now carried the line to a point near the septic tank it is found that the septic tank is not functioning, and you request us for a further Rs 6,000/- to continue the line. We do not think this justifiable

The Contractors informed me that they did not connect to the septic tank, as it has been in disuse for several years, and that it was so overgrown with vegetation that it could hardly be

re located.

It is suggested that the line should be laid out by the Engineer's layout, that the line should be laid out in the form of a line, and connect it with your road. It is suggested that it should not have a place the 7" main line, but it should have a cross-section and have been finished to the point.

I trust however that you will use your good offices in relation to recover a portion of the cost from Government.

C 21-71/12/44-45 10th April 1946.

To *HL*
The Secretary to Government,
Law Department, Bangalore
Sir, *HL*

I have the honour to invite reference to this office letter No C9-9 dated 4-11-1944 requesting orders of Government for laying a 12" sewer line instead of 9" sewer line for linking the existing septic tank behind Jampige Tank pond with manhole No 4 on the main overland sewer and to further correspondence ending with this office letter No C21-14 dated 5th March 1945. This has become very urgent as the Breweries have let in sewage from their premises. I request orders of Government may kindly be obtained pending the decision whether the Breweries should pay the additional amount of Rs 6,000/-

I have the honour to be,
Sir,
Your most obedient servant,

S. S. Srinivasan

THE DIRECTOR OF PUBLIC HEALTH
IN MYSORE BANGALORE

No C 21-143/20-45

Date May 21, 1945
22

To,

The Secretary to Government,
Law Department, Bangalore.

Sir,

With reference to your letter No L 11031 dated 8 5 1945 inviting reference to letter dated 12th February 1945 addressed to me by the Managing Director, United Breweries, Bangalore etc I have the honour to request you to kindly refer to this office letter No C 81-1126 dated 28th September 1943 wherein I have addressed Government enclosing a copy of the letter received from the President, Civil and Military Station requesting permission to connect the underground sewage from Mc Iyer Town to the City underground system I have also mentioned in the letter that the special officer discussed with the Assistant Engineer and a spot inspection was arranged by both the officers and the special Engineer has mentioned that there is no objection to the Civil and Military Station running a line upto our existing septic tank behind the sample tank It is under these circumstances permission was sought from Government for permitting the Cantonment Municipal Authorities to connect their sewage from Mc Iyer town to the underground sewage system of the City In this letter, I have also mentioned that the Cantonment Municipality have permitted underground connection from the City limits of Devarajeebanahalli to the Civil and Military Station underground system

7/14/45
Government in their letter No 24575/M1 81-43-9 dated 18th November 1943 conveyed approval of Government and this information was conveyed to the President, Civil and Military Station with this office letter No C 1 8-1171 dated 4 11 1943

Government in their letter No L 5724 dated 11th December 1944 have asked me whether this expenditure is one which can be

legitimately borne by the Bangalore City Municipality and whether it should not be met by the ~~666~~ United Breweries Ltd. whose effluent is intended to be carried in this sewer. The Breweries were written to about this matter and it is in reply to this letter they have sent letter No Nil dated 12th February 1945. All the correspondence mentioned in the Breweries letter does not refer to this office. Perhaps they have corresponded with the President, Civil and Military Station Municipal Commission with reference to the size of pipes they have to lay. The authorities of the Breweries are not entitled for the refund of any portion of the amount they have spent as the permission was given to the President of the Cantonment Municipal Commission and not to the Breweries under any conditions. I may mention that the letting in of the sewage of the United Breweries does not deteriorate the pipes.

Probably the Breweries have put in their claims for the refund as they were asked to pay ^{forward} for the additional cost to be incurred by the Municipality.

I have the honour to be,

Sir,

Your most obedient servant,

Date: 11th May 1946.

J. B. Mallaradhy, Esq., M.A.,
Secretary to Government,
Revenue Department, Bangalore

Sir,

Subject - Linking up of the existing Septic tank behind the Sampangi tank bund with manhole No 4 on the Main Ovoid sewer - modification proposed by laying 12" sewer instead of 9" sewer

With reference to your unofficial file No 130/45-46 dated the 29th December 1945 on the above subject, I have the honour to state that when this question was considered by the Board at its meeting held on 24th April 1946, it emerged from the discussion that the point involved was a technical one, the question to be determined being whether the substitution of 12" pipe for 9" one provided in the estimate was necessary in view of the extra flow from the Distillery. Accordingly, the Board resolved

"That the question be referred to the Chief Engineer for Roads and Buildings for favour of furnishing his views in the matter "

2 I am accordingly sending the papers to the Chief Engineer for Roads and Buildings for an expression of his views in the matter. The reply on receipt will

Sampangi tank bund with manhole No 4 on the main sewers in 4th and 6th divisions the extra expenditure of Rs. 6,000 will be met out of the savings effected in the
